candle decorations

Manual

Before putting the ornaments onto the candles we recommend the following.

- a. Make sure the candles are at room temperature;
- b. All ornaments are provided with a thin layer of glue at the backside. When sufficiently heated the glue will affix the ornament onto the candle. By using a special heating plate, please heat the ornaments gradually until they can be bent, instead of a heating plate you can also use a hairdryer, but please be very careful ;
- c. After heating push the ornament gently onto the candle and bend it into the right shape. As the ornament is soft and warm, we advise you to do this with the palms of your hands in order to prevent unwanted disfiguring;
- d. After having mounted a large ornament such as an Paschal decoration onto a candle, it must be fixed by putting tiny nails through the ornament into the candle so as to prevent that the ornament comes off in a cold environment.

If you have any questions with regard to this manual or otherwise, please do not hesitate to call us. We can also supply the right tools for the attachment.
